SUMMARY

Full Stack Developer with 1.6+ years of experience in building scalable web applications using React.js, Next.js, Node.js, and Express.js. Experienced in Java backend development with Spring Boot and Hibernate. Strong in REST APIs, authentication, and end-to-end application development.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, React Native, Redux Toolkit, Tailwind CSS, Three.js, Material UI

Backend: Node.js, Express.js, Java, Spring Boot, Spring MVC, REST APIs, JWT Authentication, Hibernate

Database: MongoDB, MySQL

DevOps: Docker, Jenkins, GitHub Actions, CI/CD

Tools: Git, GitHub, Postman, VS Code, Android Studio, Jira

Concepts: OOP, Data Structures (Intermediate), RESTful APIs, Authentication, RBAC, MVC Architecture, Microservices Basics

EXPERIENCE

- **Software Engineer — Worthit Consultancy Services Pvt. Ltd.** Jan 2025 – May 2026
 - Developed scalable and responsive web applications using React.js, Next.js, and Tailwind CSS.
 - Built reusable UI components using React Hooks and modern component-based architecture.
 - Developed multi-role dashboards with authentication, authorization, and protected routing.
 - Integrated REST APIs using Axios for booking workflows and business operations.
 - Worked on backend development using Node.js and Express.js and gained experience in Java Spring Boot APIs.
 - Implemented real-time features using Firebase and WebSockets.
 - Optimized performance using lazy loading, code splitting, and responsive design.

PROJECTS

- **BMC (Book My Chef) – Multi-Service Food Event Platform**
 - Developed a scalable customer-facing web application using React.js, Next.js, and TypeScript for booking chefs and event services.
 - Designed and implemented a multi-role system (Customer, Partner, Admin) with secure authentication and role-based access control (RBAC).
 - Built a responsive admin dashboard to manage users, bookings, and service workflows efficiently.
 - Integrated REST APIs using Axios for real-time booking operations and business logic handling.
 - Implemented Firebase-based real-time chat and notification system to enhance user engagement and communication.
 - Optimized application performance using lazy loading, code splitting, and responsive design techniques.
- **EventVerse – Event Management Platform**

- Developed a full stack MERN application using MongoDB, Express.js, React.js, and Node.js for event creation, booking, and management.
- Built RESTful APIs using Node.js and Express.js for user authentication, event management, and booking workflows.
- Implemented JWT-based authentication and role-based authorization for secure access control.
- Designed reusable UI components using React.js, Redux Toolkit, and Tailwind CSS for a consistent user experience.
- Integrated MongoDB database using Mongoose for efficient data storage and retrieval operations.
- Implemented CI/CD pipelines using Docker, Jenkins, and GitHub Actions for automated deployment.

ACHIEVEMENTS

- Solved 500+ problems on Java, JavaScript on Different Platforms.
- Built real-world full stack applications with modern technologies.
